

THERMOSTATIC VALVES (unions not included)

The prices of the valves indicated below do NOT include the cost of the unions for connection to the system and must be ordered separately.

The valve is turned into a THERMOSTATIC valve by adding the required THERMOSTATIC HEAD (either WAX or LIQUID type) to the valve (purchased as an accessory, see page 221 herein). To choose the thermostatic head required see the technical chart regarding thermostatic heads on page 221. The thermostatic head is supplied on request, disassembled and packed separately.
