

POSITIONING

I-CHING can be installed either Vertically or Horizontally in all sizes; the appliance is set up for positioning during installation of the recessed part.

ELECTRIC VERSION (24 Volts)

I-CHING can be ordered with or without ON/OFF switch. Since it operates at 24 Volts, the heated towel rail is supplied as standard with the transformer and with the wall-recessed housing box.  
The switch-free version must be connected to the electrical system by any control devices, including home automation.  
The model with a switch is supplied as standard with the switch-transformer connection cable. The maximum length of the cable is 4 metres and it can be shortened as needed.  
The model with a switch is supplied as standard with the switch-transformer connection cable. The maximum length of the cable is 4 metres and it can be shortened as needed.

FINISHES

All the finishes of I-Ching, whether galvanic or coloured, are applied directly to stainless steel, the material used to build the heated towel rail.

GALVANIC FINISHES

standard finish

Satin finish STAINLESS STEEL (code G0\_XSA)

most requested special finishes

(supplied with an additional charge)
