DISCOVER THE DESIGNS PUSHING THE BOUNDARIES OF **DECORATIVE RADIATORS** IN THIS SPECIAL PRODUCT EDIT, CURATED TO OFFER INNOVATIVE OPTIONS TO HEAT UP YOUR PROJECTS.

## CERAMICA BY THE RADIATOR COMPANY

Manufactured using waste material from the production of marble worktops and shower trays, the unique Ceramica Collection is specifically designed to complement systems with renewable energy sources. And, unlike traditional radiators, the Ceramica radiators produce radiant heat for an even and direct transfer of heat, utilising less energy and producing lower CO2 emissions.

## MILANO BY TUBES

Designed by Antonia Astori and Nicola De Ponti, the its iconic and sculptural Milano radiator can imbue a strong personality into its surroundings. Entirely made of carbon steel and available in both the hydraulic and in the electric version, the Milano radiator can be installed vertically floor-standing, wall-mounted or hanging from the ceiling, creating highly attractive scenic solutions.
